

All About Your Same Day Surgery

I am going to the hospital.

There will be a desk with computers and nice people to greet me.

I will wait with my parents until the nurse is ready for me.

The pre-op waiting area is where I will get ready for my surgery.

I will stand on the scale so the nurse can see how big and tall I am.

The nurse's helper will wrap a flashlight bandaid on my finger to check on me. It will feel sticky.

**The nurse's helper will place a wrap on my arm.
It will give my arm a short, snug hug.**

I will feel so brave while the nurse's helper is checking on me!

I will put on a gown and special socks to get ready for my surgery.

I will meet my nurse. She will take really good care of me!

**The nurse and doctor will listen
to my heart beat.**

I can play with toys and watch TV while my nurse and doctor talk to my family.

**I will ride on my bed to a new room
for my surgery.**

I will see machines and cool stuff to look at while the doctor's helpers put my flashlight Band-aid and wrap back on.

I will wear three stickers on my chest to listen to my heart. They will feel sticky.

I will wear a soft mask over my nose and mouth to breathe sleepy air. I will fall asleep.

**When I wake up, I can watch TV
and see my parents.**

**Everyone will be proud of me
for being brave!**

**I will get a yummy slushy and snacks
when I am all done.**

When it is time, I will go home with my family.
